Hunt's
Perfection Bulbs

Narcissus and Daffodils

THE Quarantine Act is now in effect. This prohibits the importation of Narcissus bulbs in all varieties. Our Dutch growers, anticipating the effects of this quarantine, have for several years past been cultivating these bulbs in the States with very satisfactory results; though of necessity the cost of production is somewhat higher than the Dutch-grown bulbs. Stocks are somewhat limited; we therefore strongly advise intending purchasers to place their orders early.

To Our Friends and Customers:

WE thank you for the kindly support which you have given us in past years, and bespeak the continuance of your friendship in this and coming seasons.

Please notice particularly that the Federal Quarantine Act which goes into effect this year prohibits the importation of all *Narcissi*. Our list of American-grown bulbs of *Narcissi* is fairly representative of the leading popular sorts, and though somewhat higher in price, may be relied upon to give satisfactory results. As the demand is likely to exceed the supply, early buying is suggested.

Early Ordering. Your coöperation is invited, by placing orders early; this will aid us in preparing for the summer and autumn trade and facilitate delivery at proper time.

Rush Orders may be telegraphed or telephoned at our expense.

Prices on Bulbs, Seeds, Plants, and Supplies are subject to market and tariff changes.

Terms. Prices quoted are net and do not include free transit, except for seeds in packets, ounces, or quarter-pounds, on which we prepay postage or expressage to any point in the United States.

Upon delivery of goods by us to the carrier, ownership passes to the purchaser; when the carrier issues a receipt our responsibility ceases. Claims for damage should be made to the agent at point of delivery.

Non-Warranty. William M. Hunt & Company, Inc., give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs, or plants they send out, and they will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

How to Grow Bulbs

Daffodils and Crocuses may be planted in the garden between the first of September and the middle of October; Tulips the latter part of October; and Hyacinths any time from September to December.

When grown in beds, Hyacinth and Tulip bulbs should be planted at a uniform depth. The easiest way to do this is to remove all soil from the bed to the depth required, set the bulbs as far apart as the planting-table indicates, and carefully replace the soil. Many people do not think this is worth while; they prefer to plant with a trowel or dibble. Where this practice is followed, great care should be taken to see that the base of the bulb is pressed firmly into the soil.

After the ground is frozen to a depth of 4 to 5 inches, it is well to put on a cover of straw or leaves. This should be removed rather early in the spring. Tulips and Hyacinths should be taken up each year. Let the foliage mature, either where they have flowered or in another location. After drying, the bulbs should be kept in cool, dry place.

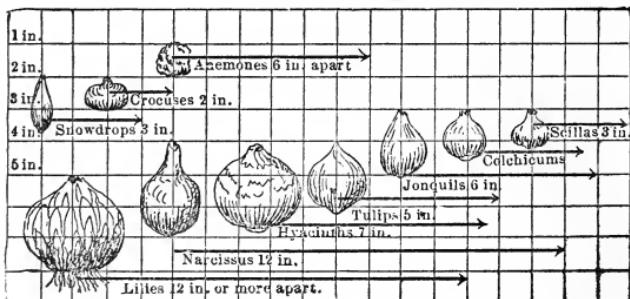

Daffodils may remain in the same place for three to four years at a time. The clumps may then be taken up and divided for replanting.

Crocuses give a delightful effect in early spring, but, like Narcissi, should not be planted where grass is kept clipped. They are extremely desirable in naturalistic plantings, but to obtain good effects it is essential that they be used in large quantities; plan to use several thousand in each 50-foot square of woodland or meadow.

Lilies prefer a light soil with good drainage. This may be secured by placing a quantity of sand below each bulb, or by mixing peat or humus with the soil. The tall varieties should be planted in a location where they receive protection from high winds; all of them are partial to shade.

CULTURE INDOORS.—Paper-White Narcissi and the Chinese Sacred Lilies are the easiest sorts to grow. A bowl of pebbles and water is the "garden." Hyacinths likewise present little difficulty. Place each bulb in a glass so that the base barely touches the water, and leave them in a cool, dark place until the roots develop. They may then be brought into the light, and will produce just as fine flowers as if they were grown in pots or outdoors. Start the bulbs any time between September and January; for succession of bloom bring them into the light at intervals of several weeks.

Many of our customers are frequently puzzled to know proper depth and distance apart at which bulbs should be planted. The accompanying diagram, conveys the information very clearly. The chart will bear careful study.

A natural planting of *Narcissus Poeticus*

Narcissi and Daffodils Mixed for Naturalizing

The above mixture contains many varieties of Narcissi and Daffodils that are most suitable for planting in borders, lawns and woodlands, and comprise varieties which will give abundance of flower and continue to thrive indefinitely.

\$10 per 100, \$95 per 1,000

New Varieties—Dutch Bulbs

The cream of the most recent introductions from the best growers in Holland.

DARWIN TULIPS

	Dis.	Doz.	100
Chante de Cygne. Salmon-scarlet, shaded soft rose. Distinct and refined flower.....		\$7.50	\$60.00
Jacob Maris. Maroon-red, dark center bordered white.....	6.00	50.00	
Marnix. Carmine-rose, with orange margin. Medium height.....	2.00	15.00	
Orange Perfection. Fiery salmon-orange.....	10.00		
Pulcinella. Attractive bright red.....	4.00	30.00	
The Bishop. Blue-violet, with white base. Elongated flower of artistic shade.....	4.00	30.00	
Zwanenburg. The raiser claims this novelty to be the only pure white Darwin Tulip in cultivation. Very large flower of fine substance	Each, \$2..		

BREEDER TULIPS

Duke of Edinburgh. Deep violet with lighter shading; very fine strong flower.....	4.00	30.00
Garibaldi. One of the finest Breeder Tulips ever offered. Lilac-bronze edged primrose-yellow. Beautifully shaped flower borne on long stem.....	4.00	30.00
Indian Chief. Coppery red, flushed purple. Long and artistic flower carried on long strong stem.....	10.00	
La Turquoise. An unusual color combination—brownish violet, with broad yellow edge. Handsome shaped flower..	2.50	20.00
Marechal Victor. Clear blue, flushed bronze, edged with apricot-brown. Distinct and attractive.....	5.00	

Botanical Tulip—Clusiana. Outer petals bright cherry-red, inner petals creamy white, with violet base; small flower, but very distinct and beautiful. Suitable for rock gardens and herbaceous borders. \$1 per doz., \$6 per 100, \$55 per 1,000.

Soleil d'Or. Dark yellow, orange cup.....	3 00	16 00	150 00

FREESIAS

Red Bank, N. J., February 4, 1924.

The Yellow Prince Freesias are the best I have ever seen, good colors, full flower, and lots of flowers. I am going to exhibit them. (Signed) THOMAS W. HEAD, Supt. to Messrs. P. S. and H. N. Straus.

Elegant and deliciously perfumed flowers of long duration. If planted early may be forced into bloom for Christmas. Put eight or ten bulbs in a 6-inch pot, covering them with one inch of soil.

Doz. 100 1,000

Fischeri. (True.) Mammoth pure white flowers. Top-size bulbs.....	\$1 00	\$8 00	\$75 00
Purity. Snowy white flowers of large size, borne in great profusion on stems 2 to 2½ feet long, which grow upright and stiff.			
Largest bulbs. XXX.....	1 00	7 00	60 00
Second size. XX.....	75	5 50	50 00
Refracta alba. Mammoth bulbs.....	1 00	7 00	60 00
Yellow Prince. The best yellow variety. Very large flowers.....	1 25	8 50	80 00
Gen. Pershing. Exquisite shade of rose-pink; flowers uniformly large.....	1 00	7 00	65 00
Viola. Delicate violet-blue; very handsome.....	1 25	8 00	70 00
Giant Colored Hybrids. A mixture of various shades of lavender, orange, pink, yellow, etc.....	1 00	6 00	55 00

NOVELTY FREESIAS

The following beautiful new colored Freesias are the result of many years of painstaking effort on the part of that well-known specialist, Alois Frey, of California, and who introduced a few years ago the grand variety General Pershing.

PLEASE NOTE: As the output is comparatively small, we suggest early purchase.

California. A large flower of bright golden yellow; extra-fine, strong growth and long stems. One of the very finest yellow Freesias.....	Doz. 100 1,000
	\$1 50 \$10 00 \$95 00
Carmencita. Medium-sized flower of a beautiful light orange-salmon hue, with buff shading on the lower petals; long, wiry stems.....	1 00 7 00 65 00

NOVELTY FREESIAS, continued

Carrie Budau.	A lavender-pink and a great improvement over General Pershing, with larger flowers and heavier stems. An enormous grower and producer.....	Doz. 100	1,000
		\$1 00	\$7 50 \$70 00
Ilena.	Deep rosy lavender, with white throat and deep orange blotch on lower petal. Good, stiff stems. Flowers very large and very attractive...	1 50	9 50 90 00
June Michelsen.	Large, deep rose-pink flowers with light blush throat; three lower petals veined purplish crimson, with a deep yellow blotch on center petal. Good, stiff stem and strong constitution. A variety of special merit.....	1 50	10 00 95 00
Olivette.	Bright carmine-red, with light yellow throat, lower petals having a deep yellow blotch with crimson veins. Very profuse bloomer.....	1 25	9 00 80 00

(Descriptions are by Mr. Frey and bulbs offered are of his own raising)

LILY-OF-THE-VALLEY

Windholme Farm, Islip, Long Island, *March 1, 1922.*

Gentlemen: I take great pleasure in recommending your cold-storage Lily-of-the-Valley. The two shipments you sent me were the finest I have ever grown, with long stems of great substance and the quality of the flowers excellent.—THOMAS WILSON, Supt.

Extra-strong Berlin pips, for forcing, from cold storage. \$16 for case of 250, \$60 per 1,000.

COLD-STORAGE LILIES

We carry a limited quantity of the following varieties in cold storage, for immediate and later delivery.

Lilium speciosum album.	Large bulbs. 8 to 9-in. cir.....	100	\$30 00

Second-size Bulbs, 7 to 9 inches in cir. X..... 4 50 30 00

HARDY GARDEN LILIES

For Fall and Spring Planting

Hardy Lilies are among the most gorgeous and easily grown subjects for the herbaceous border, and, without crowding other plants, throw up their sturdy stems each year with an eager desire to unfold their wonderful blooms over the heads of nearby companions, and hold the admiring gaze of those who pass by. Lilies thrive in partial shade, that is, the lower stem and bulb are better shaded by the foliage of other plants. Their stem roots, which feed almost on the surface of the soil, need plenty of food and moisture. They revel in the "peaty" soil of a rhododendron bed, but thrive equally well in a rich sandy loam. The most beautiful forms are *Lilium auratum*, *L. speciosum*, vars. *melpomene* and *rubrum*, *L. regale*, *L. tigrinum*, and *L. Henryi*. Plant from 4 to 6 inches deep.

*Ordinarily Japanese Lilies arrive in November. When bulbs come to hand too late for fall planting, orders booked are carried over for spring delivery

***Auratum** (The Golden-banded Lily of Japan). One of the stateliest of all the hardy Lilies; grows 3 to 6 feet high and bears twenty or more large and fragrant flowers 8 to 10 inches in diameter. Planted in clumps of six or so, they make an attractive sight. Flowers white, spotted deep red, with bright yellow band running through the center of each petal, in August.

	Doz.	100
Mammoth bulbs, 11 to 13-in. cir.....	\$7 50	\$55 00
Extra-large bulbs, 9 to 11-in. cir.....	6 00	45 00
Large bulbs, 8 to 9-in. cir.....	3 50	27 50

Batemanniae. Beautiful Japanese variety, growing 3 feet high, with six to eight apricot-colored flowers on a stem. Blooms in July and August..... 4 00 30 00

Canadense (Canadian Bellflower Lily). One of the best of our native Lilies. Flowers vary in color—red and yellow. Grows 2 to 5 feet high; very suitable to plant among shrubbery and thrives well in the shade. Flowers in June and July. Very hardy..... 2 50 18 00

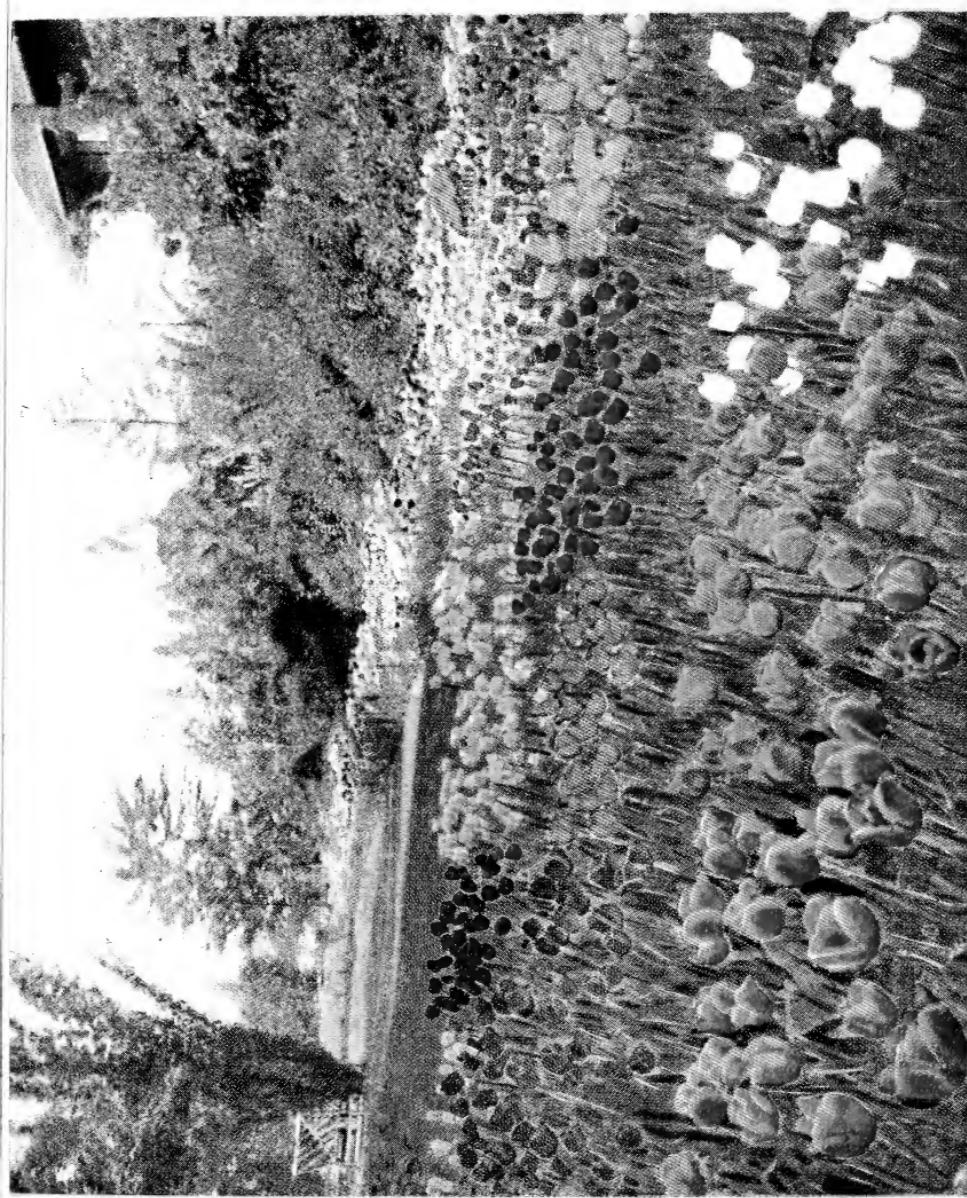

Croceum. 3 to 4 ft. Golden yellow flowers in June and July. Very reliable and hardy Lily..... 4 00 30 00

Dahuricum. One of the most reliable and hardy Lilies, producing reddish yellow flowers of good size in June and July. Plants attain a height of 3 to 4 feet in good soil.... 3 00 18 00

Elegans. 3 ft. Mixed colors. Vigorous and easy grower. Flowers in June..... 2 50 16 00

HARDY GARDEN LILIES, continued Doz. 100

* <i>Hansonii</i> (<i>maculatum</i>). Rare Japanese Lily that produces clusters of six to ten reddish flowers of extremely thick substance and moderate dimensions. Under favorable conditions attains the height of 3 feet. Early and beautiful. Once established blooms profusely each year . . .	\$10 00	\$75 00
* <i>Henryi</i> (Yellow Speciosum). 4 to 5 ft. In form and habit resembles <i>L. speciosum</i> . Flowers shaded yellow, slightly varying in color, with a distinct and waxy green center. Comes into bloom during August and September.	10 00	75 00
<i>Pardalinum</i> (Leopard Lily). 4 ft. A robust and free-flowering variety. Does well in all situations and produces superb flowers of rich scarlet and yellow, spotted with brown. Flowers in July.	3 50	24 00
<i>Regale</i> (<i>Myriophyllum</i>). 3 to 4 ft. Of comparatively recent introduction, this variety has come to be regarded as one of the best Lilies for the garden. White flowers, trumpet-shaped, slightly suffused pink, with yellow center; very fragrant. At its best about the end of June. Plant is very slender and takes very little room when out of flowers. Will thrive in any good soil if not too wet.	10 00	75 00
* <i>Speciosum album</i> . 3 to 4 ft. This is a very dainty white Lily. It flowers in the border or amongst the shrubbery at the same time as <i>L. auratum</i> , and is one of the most popular varieties. Used extensively in pots for greenhouses. Extra-large bulbs, 9 to 11-in. circum.	7 00	50 00
Large bulbs, 8 to 9-in. circum.	5 00	35 00
* <i>Speciosum</i> , <i>Melpomene</i> . Large, dark crimson spotted flower of striking appearance. Profuse flowering.		
Mammoth bulbs, 11 to 13-in. circum.	8 00	60 00
Extra-large bulbs, 9 to 11-in. circum.	6 00	45 00
Large bulbs, 8 to 9-in. circum.	3 50	27 50
* <i>Speciosum rubrum</i> . Bears an abundance of spotted deep rose flowers, and attains a height of 3 to 4 feet. Blooms outdoors August and September.		
Mammoth bulbs, 11 to 13-in. circum.	8 00	60 00
Extra-large bulbs, 9 to 11-in. circum.	6 00	45 00
Large bulbs, 8 to 9-in. circum.	3 50	27 50
<i>Superbum</i> (American Turk's-Cap Lily). One of the finest and hardiest of all the native Lilies. Often reaches the height of 6 feet and produces a large number of bright orange-spotted flowers in July and August.	3 00	20 00
<i>Testaceum</i> (<i>excelsum</i>). Produces handsome nankeen-yellow flowers on a stalk 4 to 6 feet high. A most unusual color in Lilies. Blooms in July.	27 50	
<i>Tigrinum splendens</i> (Tiger Lily). 3 to 4 ft. Orange flowers spotted black. Very hardy. Blooms in August.	2 50	20 00
<i>Tigrinum flore-pleno</i> (Double-flowering Tiger Lily). Like above but double flowers.	3 50	25 00

Planting of Darwin Tulips. For varieties, see special offer on next page

THE following varieties of Darwin Tulips are all well known and reliable, and are specially recommended for massing in beds and borders.

	100	1,000

Darwin Tulips Mixed. Our mixture contains all the above varieties, in a proper proportion. For massing in borders and for cutting, cannot be excelled.....	75	4 50	40 00

BREEDER TULIPS

These are the old Dutch self-colored Tulips which have been neglected for many years, but the present taste for artistic colors has, however, called them into prominence once more. Nature's happiest color combinations of purple and bronze, grey and lilac, brown and orange, are revealed to us in this group. The flowers are mostly large, but of perfect form, and are borne on tall, strong stems. They may be successfully brought into bloom in the greenhouse by the first week of April.

	Doz.	100	1,000
Annie McGregor. Dark rosy red, with white base. A fine flower of very attractive appearance.....	\$5 50	\$40 00	
Bacchus. Deep violet-blue, with darker bloom, inside light violet-blue, with white star at base. A beautifully shaped flower on a sturdy stem. Recommended for early forcing.....	2 50	17 50

LILY-FLOWERED TULIPS

May-Flowering

This handsome and distinct new race of Tulips has been obtained by crossing *Tulipa retroflexa* with a pink Darwin variety, and the result is a sturdy growing form with large, substantial flowers that still retain the form and elegance of Retroflexa, all segments reflexing a little at the tips.

		Doz.	100

May-Flowering Tulips, Inglescombe Yellow

(OVER)

May-Flowering Tulip Inglescombe Yellow

The variety is sometimes called the Yellow Darwin. The canary colored flowers are of magnificent shape and are borne on long strong stems.

For borders and for cutting we know of no better kind in this class.

\$5.50 per 100; \$50 per 1,000

SINGLE EARLY TULIPS

The old-fashioned Single Early Tulips are unsurpassed for bedding and, with few exceptions, excellent for forcing. The following are the cream of the best varieties.

Perfecta. Bright yellow, scarlet and green.....	1 00	6 00	50 00
Splendid Mixture. All the above varieties.....	75	4 50	40 00

HYACINTHS

Hyacinth bulbs are very scarce this season. Order early to secure varieties required.

Hyacinths may be put to several uses. They may be grown in beds, borders, forced in pots or pans, or grown in water, and are very easy of cultivation. They possess a wonderful perfume, and there are many shades ranging from Pure White, Pale Blue, Lavender, Mauve, Purple, Red, Pink, Blush-White, and Yellow. Suitable alike to the amateur and professional grower.

SELECTED TOP-SIZE BULBS

SINGLE BLUE

Bismarck. Sky-blue; very large spike; excellent for forcing.

Dr. Lieber. Lavender-blue, tinged violet.

NARCISSI

Narcissi, or Daffodils, vie with tulips for popularity in spring gardens. By a careful selection they bloom from March into the middle of May. Many varieties may be forced in greenhouses or grown in pots or dishes in the home; very easy to cultivate. Adapted to every garden and adopted by every gardener.

The Federal Quarantine Act being now in effect, no *Narcissus* bulbs can be imported from abroad, and the varieties offered this season are therefore American-grown. Due to the better standards of living in the United States, and consequently heavier costs of production, the growers' prices are necessarily somewhat higher than for Dutch bulbs, but we have every assurance of the excellent quality of the American-grown product. Until this new industry has had time to become thoroughly established, there will be a limited supply, and we therefore recommend our clients to place their orders early, in order to make sure of securing the varieties they may select.

LARGE TRUMPET (Ajax)

Varieties belonging to the Ajax division have trumpets or crowns as long as or longer than the perianth segments.

AJAX BICOLOR

	Doz.	100	1,000
Empress. Sulphur-white perianth, with chrome-yellow trumpet, very good late forcing variety.

1. *Narcissus*, King Alfred
2. *Narcissus*, Poeticus Ornatus

3. *Narcissus* Bicolor, Victoria
4. *Narcissus*, Double Von Sion

AMARYLLIS

For growing in the house or conservatory, few plants produce as striking a display, with so little trouble, as Amaryllis. The bulbs should be potted in the fall, be kept rather dry all winter until growth starts in early spring when they should be watered plentifully, fertilized and lightly shaded. A few weeks, and they break into immense lily-like blooms of gorgeous color and form.

After blooming, the leaves appear and the plant should be kept growing for a few months to store up strength for next year's flowers, then rested a while and the process repeated.

Vittata Hybrids. This selection contains a mixture of the finest unnamed seedlings in cultivation. The colorings and markings are unique and provide a show of unexampled beauty. Extra-large, sound bulbs of enormous size. \$1.50 each, \$15 per doz.

SPIRAEA

Extra Large Clumps

We recommend the following varieties for forcing or outdoor culture. The clumps we offer are very large and cannot fail to give satisfaction.

CULTURE.—They require a compost of equal parts of loam and leaf-mold and should be potted singly in 6 or 7-inch pots, in October or November. Place in coldframe until required for forcing; water freely when growth begins. Remove to coldframe after flowering and plant out in sunny position in June.

America. Lilac-rose—a beautiful orchid color with large, feathery flower-spikes and beautiful foliage. This variety is one of the very finest and holds its color well. Medium height. (13 weeks)	Doz. \$11 00
Cassandra. Dense, very double flowers of rosy red—the deepest color yet developed. Graceful foliage. (15 weeks)	24 00
Ceres. Delicate lavender-pink. Magnificent plumes, frequently measuring over 1½ feet, and altogether one of the showiest of all Spiræas. The foliage is light green and tall and the whole plant is very graceful. (13 weeks)	17 00
Gladstone. Well known and best white variety. Flower-spikes are cream-white, large, full, and feathery. Foliage is compact and deep green. Earlier than the pink kinds. We have a fine stock. (10 weeks)	11 00
Juno. Deep lilac-rose. Graceful, spreading foliage. Slender flower-spikes of good shape. Tall grower and latest of all. (14 weeks)	13 00
Kriemhilda. A pleasing and peculiar shade of soft creamy salmon with red flower-stems. Heavy, well-shaped plumes and graceful foliage. Medium height. (14 weeks)	13 00
Mont Blanc. Clear milk-white flowers. Deep-green foliage; of dwarf habit. Very free flowering. (14 weeks)	13 00
Peach Blossom. True peach-blossom color with red stamens. Full light green foliage. Holds color well. Very fine. (13 weeks)	13 00
Philadelphia. Deep lavender-rose. Tall and sturdy grower with abundance of graceful foliage. Heads are full and feathery and the whole plant is large. (14 weeks)	13 00
Princess Mary. Deepest rose-pink in commerce today. Flowers have slight lilac cast. Vigorous grower and in every respect a beautiful variety. Medium height. (14 weeks)	10 00
Queen Alexandra Improved. Soft light pink, large, individual recurved flowers, borne on heavy plumes. Tall and midseason. Foliage is abundant and of spreading habit with red stems and veins. (12 weeks)	13 00
Rubens. Attractive deep rose, with red flower-stems. Flat-growing foliage of glossy dark green. Medium height. (13 weeks)	10 00

CALLA LILIES (Richardia)

	Doz.	100
Æthiopica (White Calla Lily). Mammoth bulbs. XXX	\$6 00	\$45 00
Large bulbs. XX	5 00	35 00
Godefroyana (Small White Calla Lily). Very free-flowering	5 75	40 00
Elliottiana (Yellow Calla Lily). Golden yellow	6 75	45 00

IRIS (Fleur-de-Lis)

Iris Tingitana and Spanish Iris may be grown both in and outdoors. If planted indoors they should not be forced as they will be apt to come blind; given a slow treatment they will bloom without difficulty around March. Highly recommended on account of their wonderful shape and remarkable fragrance.

Imperator. Early-flowering Holland Iris. Brilliant blue, large and well-shaped flowers on long, strong stems. The best of the Filifolia type for forcing. \$2 per doz., \$14.50 per 100.

Tingitana. Early-flowering Dutch Iris; produces large, well-shaped blue flowers on long, strong stems, and if grown cool in greenhouse may be had into flower early in March. This variety will not stand forcing. \$1.75 per doz., \$12 per 100.

SPANISH IRIS

	Doz.	100	1,000
Alex. von Humbolt. Exquisite light blue.....	\$1 00	\$7 00	\$65 00
Belle Chinoise. Dark golden yellow.....	1 00	7 00	65 00
British Queen. Large, pure white. Extra.....	1 00	7 00	65 00
Cajanus. Canary-yellow.....	1 00	7 00	65 00
Darling. Lovely azure-blue.....	1 00	7 00	65 00
Emperor of the West. Dark bronze.....	1 00	7 00	65 00
Excelsior. Light blue, deep orange blotch.....	1 00	7 00	65 00
Flora. Creamy white, with lavender standards.....	1 00	7 00	65 00
King of the Blues. Intense blue; fragrant.....	1 00	7 00	65 00
Louise. Very pale blue and white.....	1 00	7 00	65 00
Snowball. Pure white; handsome shaped flower.....	1 00	7 00	65 00
Spanish Iris, Mixed. A fine mixture of the above varieties; suitable for bedding and for cutting....	75	5 50	50 00

GARDEN IRIS (Bearded Fleur-de-Lis)

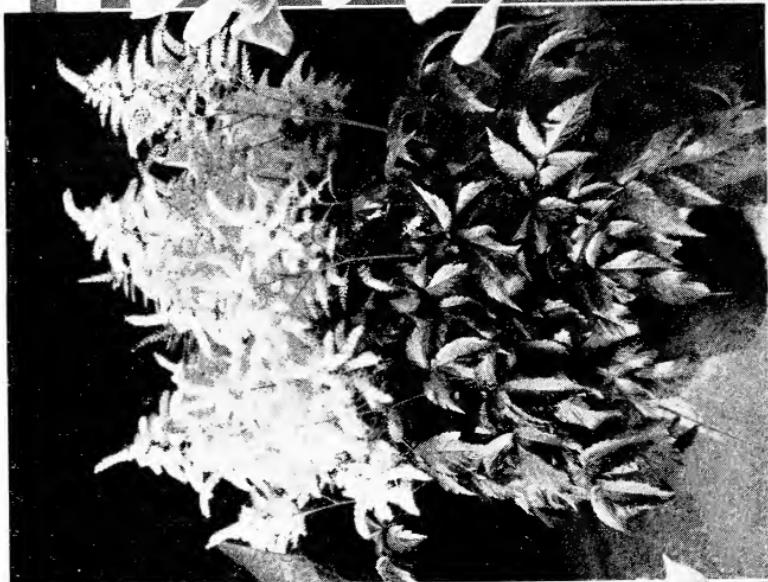

The Garden, or German varieties succeed in any soil and in almost any location, being especially suitable for herbaceous borders. The finest blooms are obtained from established plants; consequently they should remain where planted undisturbed for at least five or six years. The plants should be given a protection of leaves or salt hay during the winter.

	Doz.	100
Admiral Togo. White, faintly tinged lavender, falls and standards lightly bordered purple. Of the habit of Madame Chereau. Extra-fine, clean color.....	\$1 50	\$9 00
Candicans. Standards light lavender; falls reddish purple....	1 50	9 00
Florentina, Blue. Tall and vigorous; deep dark blue.....	1 50	9 00
Gertrude. Standard and falls same shade—rare violet-blue ..	1 50	9 00
Her Majesty. New and very beautiful. One of the choicest. Standards lovely rose-pink; falls bright crimson, tinged with darker shade.....	3 00	20 00
Loreley. Standards pale yellow, mottled purple; falls purple, deeply veined yellow margin.....	1 50	9 00

Spanish Iris

Spiraea, Gladstone

Miscellaneous Bulbs

For some years, because of the plant quarantine, we have not been able to offer several varieties of bulbs which appear in our list this season. They cannot be developed satisfactorily in this country, and, as we were unable to import them, it meant that we had to dispense with them entirely.

This quarantine has now been modified, so we are able to offer once more a wide selection of first quality French and Holland bulbs.

Border of Hunt's Perfection Peonies. *Insert, Peony, Avalanche*

PEONIES

Our list of Peonies is not very extensive but we have endeavored to select the better medium-priced varieties that will cover a good range of colors, to offer to our customers. Divisions of 2 to 3 eyes.

Doz. 100

Albert Crousse. Large, very full, evenly formed bloom; flesh-pink, center shaded with clear pink. Petalage small and very dense.....	\$12 00	\$90 00
Avalanche. This is, in our estimation, one of the finest Peonies grown. Large, convex bloom of perfect form; color, milk-white with cream-colored center; has ruby-colored markings of rare delicacy and beauty on some of its petals. A superb Peony. None better.....	9 00	60 00
Couronne d'Or. Immense, very full, imbricated bell-shaped blooms; color snowy white, with yellowish reflex and light carmine edges on a few center petals. Grand cut-flower sort. Comes in after all other long-stemmed whites are done.....	9 00	60 00
Duchesse de Nemours. Very fine cup-shaped bloom, sulphur-white with greenish reflex; fine bud.....	6 00	45 00
Edulis Superba. This is the famous Decoration Day Peony. Color, a beautiful bright, clear pink, with silvery reflex...	6 00	45 00
Eugenie Verdier. Pale hydrangea-pink, collar lighter, center deeper flecked crimson; fragrant. Very distinct from Eugenie Verdier, with which it is often confused.....	12 00	90 00
Felix Crousse. The ideal self-colored red Peony. Large, globular and compact; an even shade of bright red without a trace of any other color.....	12 00	90 00
Festiva Maxima. Enormous, full, double bloom; petals very broad; color, pure white with an occasional carmine spot; very vigorous grower.....	6 00	45 00
L'Indispensable. Lilac-white, shading to violet-rose toward the center. A large, double handsome flower....	9 00	60 00
Monsieur Jules Elie. This is king of all Peonies, and is without question M. Crousse's masterpiece. Color, an ideal glossy lilac-pink, shading to deeper rose at the base of the entire flower, overlaid with a sheen of silvery rose that fairly dances and shimmers in the sunlight.....	18 00	110 00
Queen Victoria. The very best everyday white and, when cut, a first-rate keeper. Flowers of good substance and color; very pretty in the bud state, when it has a faint blush tint; an old standby.....	6 00	45 00
Triomphe de l'Exposition de Lille. Large, compact bloom of a fresh hydrangea-pink splashed with darker tints of violet-rose, and with white reflex. The guard petals change to nearly white.....	6 00	45 00
Triomphe du Nord. Very even violaceous pink; enormous bloom. Late midseason.....	4 50	30 00

Flower Seeds for Greenhouse Culture

1452 Asylum Ave., Hartford, Conn., May 4, 1920.

"You will be interested to know that the flower seeds we received from you turned out a better percentage in germination than seeds from three of the leading seed stores in America; both Mrs. Williams and myself are very well pleased with the results. We are of the opinion that it pays to study quality rather than cheapness when buying seeds."

(Signed) H. SEARS, Head Gardener, Dr. G. C. F. Williams' Estate.

Hunt's Geneva Pink Antirrhinum (Snapdragon)

ANTIRRHINUM, HUNT'S GENEVA PINK

A Wonderful New Snapdragon

Lovely in color. Profuse in bloom. Strong in growth.
Unrivaled by any other new or old Antirrhinum

Recently awarded Certificate of Merit at the

CLEVELAND FLOWER SHOW
LAKE GENEVA HORTICULTURAL ASSOCIATION
NEW YORK INTERNATIONAL SHOW
CHICAGO FLORISTS' CLUB

AMOST superb Snapdragons, the best we have ever had the privilege of seeing. The individual flowers are large, a delightful glistening rose-pink, borne in long, dense spikes, and supported on long, stiff stems, well furnished with rather dark green foliage. The plants are robust growers, and bloom with remarkable freedom. *Geneva Pink* grows and blooms equally well outdoors or under glass.

Those who have seen Hunt's *Geneva Pink* are enthusiastic over it; we already have many orders for seeds just by its worth being spread by gardeners who have seen it.

For many years Mr. Axel Johnson, Lake Geneva, Wisconsin, has been growing Snapdragons, selecting seed from the best. Several well defined but not fixed strains resulted. About three years ago a beautiful rose-pink strain that Mr. Johnson particularly prized came true; this was named *Geneva Pink*. The seed is grown for us under glass to avoid any chance of mixture—it will come true. This year we have sufficient to enable us to offer a limited amount to our customers. We suggest early orders to avoid disappointment.

Carefully Chosen Perennial Seeds

Hardy Perennials are the backbone of the garden. They are the foundation upon which the more fleeting and changeable structure of annual flowers is arranged. Without them the garden is an impermanent thing and lacks the tranquil air of stability which they establish.

For the convenience of busy people and to assist beginners, we have specially chosen 12 of the choicest Hardy Perennials, valued at \$1.50, which we offer for \$1 postpaid.

These 12 varieties will make a well-balanced little garden or bed, with a wide range of color and form, and by their natural increase lead to fuller and more handsome effects increasing in beauty and strength from year to year.

For best results sow Perennials in July and August.

Grass Seed Mixtures

From the Finest Recleaned and Tested Seeds

HUNT'S PERFECTION LAWN SEED

This mixture is well worthy the name we have bestowed upon it, and we firmly believe is destined to become the favorite Grass Seed for use where a fine lawn is of importance. It is the result of careful study and trials made during the past few years under varied conditions. In advance of cataloging Hunt's Perfection Lawn Seed, we sold, privately, several lots of this mixture during the past two years, and in each and every instance the results obtained have been remarkable, quite confirming our own trials and fully meeting our expectations. Those who have tried out this seed tell us that "we have got the real goods for a perfect lawn." Lb. 80 cts., 20 lbs. \$12.50, 100 lbs. \$60.

Hunt's Perfection Lawn Seed contains 10 per cent South German Mixed Bent (Creeping Bent).

PROSPECT PARK LAWN SEED

This mixture is made of the finest American and European grasses specially adapted for lawns. With proper care of the soil before sowing it will produce a rich, velvety lawn in six to eight weeks, which will remain green throughout the year. For making new lawns we recommend 5 bushels to the acre; 1 pound of seed will sow 250 square feet; for renovating use one-half this quantity. Lb. 55 cts., 20 lbs. \$9.50, 100 lbs. \$46, 1,000 lbs. \$450.

MIXTURE FOR SHADY LAWNS AND UNDER TREES. This mixture is a combination of dwarf-growing grasses which thrive in shaded places. It quickly produces an abundant and even growth of lovely green grass where ordinary lawn seed mixtures are failures. Lb. 80 cts., 20 lbs. (bus.) \$12.50, 100 lbs. \$60.

GRASS SEED MIXTURES, continued

TERRACE LAWN SEED. A mixture of fine stoloniferous grasses specially suited to terraces. Will produce a rich and lasting turf. Sow at the rate of 2 pounds per 100 square feet. This mixture is a combination of such grasses as will make a quick, strong growth, taking a firm hold of the soil and prevent washing away by heavy rains. Lb. 80 cts., 20 lbs. \$12.50, 100 lbs. \$60.

TENNIS-COURT MIXTURE. Will make a firm, green and lasting turf in the shortest possible time, that will improve with trampling. Lb. 90 cts., 20 lbs. \$13.50, 100 lbs. \$65.

SEASHORE MIXTURE. This mixture is peculiarly suited to seaside lawns, etc. Lb. 80 cts., 20 lbs. \$12.50, 100 lbs. \$60.

POLO FIELD MIXTURE. A mixture of specially selected grasses for heavy trampling that will quickly recover from hard usage. 100 lbs. \$60, 500 lbs. \$275.

Hunt's Lawn Dressing Seed

A new product that should not be confused with ordinary lawn dressings, which are merely fertilizers

Our Lawn Dressing Seed is a scientific blending of the Finest Lawn Seeds with those fertilizing elements that give nourishment to the rootlets, thus insuring perfect growth, fine texture, and deep, rich coloring. Germination and rapid growth are stimulated by its free use.

UNSURPASSED FOR RESTORING OLD LAWNS

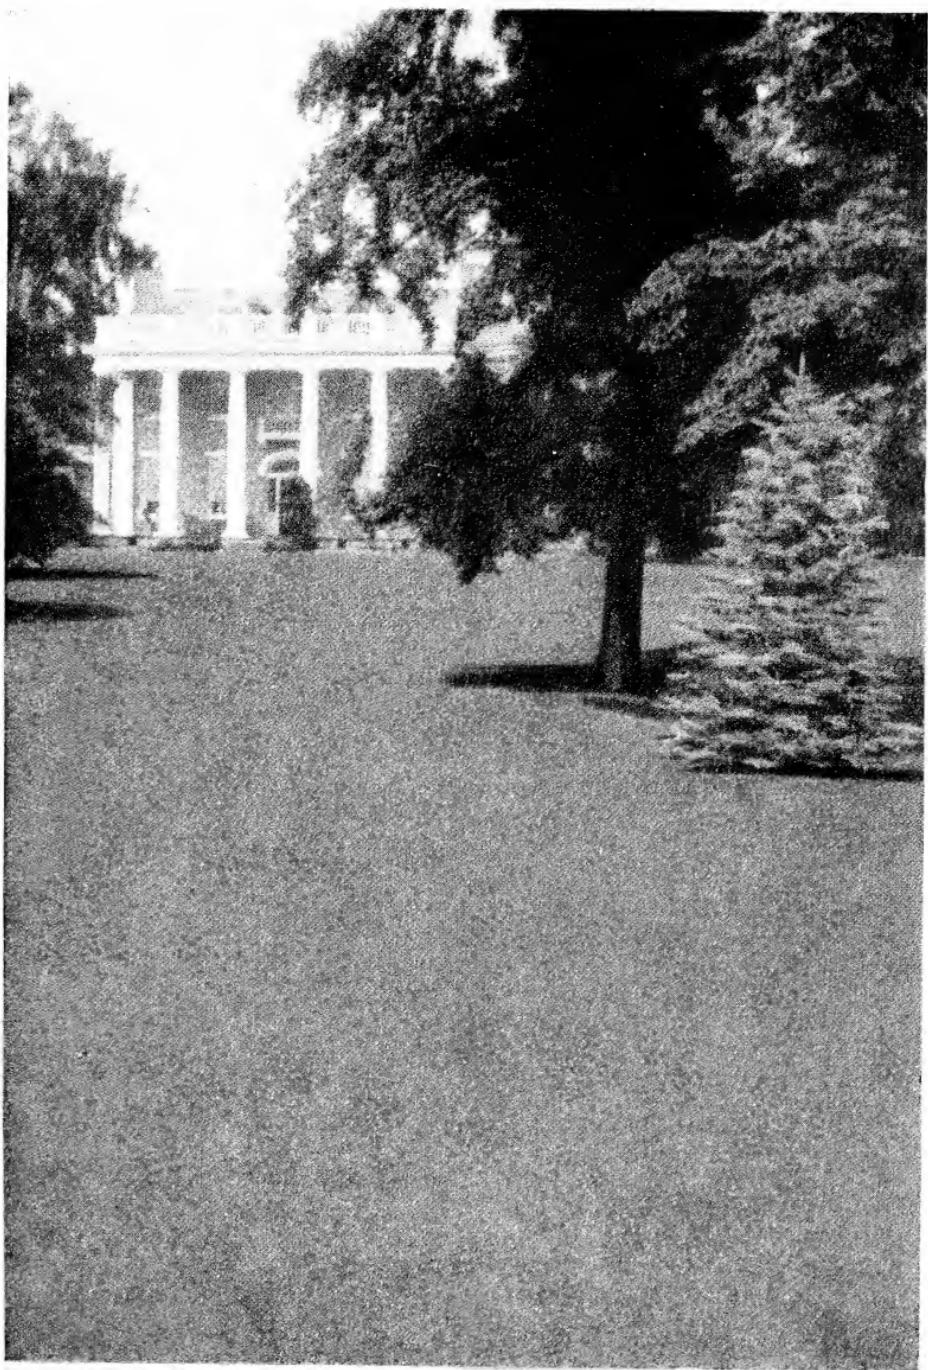

"Old age" impairs the looks of many lawns. Bare and worn spots are developed; weeds spring up and choke the grass. Lawn Dressing Seed will restore these lawns. Rake the worn spots thoroughly with an iron-tooth rake; spread the Lawn Dressing Seed heavily on such places and more lightly on the remainder of the lawn. A new growth will soon appear, covering the whole surface with a thick turf.

GIVES NEW LAWNS THE RIGHT START

After preparing the ground spread Lawn Dressing Seed at the rate of 25 lbs. to each 250 square feet. This gives a foundation for a perfect lawn. A day or two later sow the whole area with our Prospect Park Lawn Seed at the rate of 1 pound to each 250 square feet. This insures a permanent turf of fine texture which will remain green from spring to fall.

For Golf Courses this product quickly brings the turf to perfection. Our Lawn Dressing Seed is recommended for fairway and putting-greens where it is vitally important to have the finest surface.

100-lb. bag, \$40; 50-lb. bag, \$21; 25-lb. bag, \$11; 5-lb. bag, \$3

Hunt's Prospect Park Lawn Seed Mixture

HOW TO MAKE A LAWN

To produce a good lawn requires considerable work; do not make the mistake of trying to cheapen the preparation, for nowhere in the garden is the old axiom of "what is worth doing, is worth doing well," better illustrated.

The soil must be deep; a good lawn cannot exist on thin soil. Plow the ground deep—a foot is none too much. Apply to the soil before plowing, a heavy coating of well-rotted stable manure. Fresh manure carries too many weed-seeds; its use should be avoided. A lawn will not thrive on sour soil; lime the ground after plowing, using 2 tons of ground limestone to the acre. If manure is not available, sheep manure or chemical manures may be substituted.

Ground bonemeal, 1½ tons to the acre, is a good lawn fertilizer, furnishing plant-food over a long period; 100 pounds of nitrate of soda and 100 pounds of dried blood to the acre should be applied at the same time; these furnish nitrogen for immediate use. Sheep manure at the rate of 1,000 pounds to the acre may be used instead of nitrate of soda and dried blood. When only a small lawn is being made, use 20 pounds of bonemeal to 250 square feet, ½ pound each of nitrate of soda and dried blood, or 6 pounds of sheep manure. Harrow and cross-harrow until the ground is thoroughly pulverized; the better harrowed the ground is, the better the grass will grow and the more permanent the lawn.

Sow Hunt's Prospect Park Lawn Grass Seed, a mixture of the finest American and European grasses adapted to lawn uses; it will produce the rich velvety effect so much desired. An acre requires 5 bushels of seed or one pound to each 250 square feet. Harrow or rake the ground lightly, and roll with a heavy roller.

GENERAL LIST OF GRASSES

Canada Blue Grass. Useful for sowing on hard clay and poor soils. Gives a large crop of hay. Sow 60 lbs. per acre. Weight per bus., 14 lbs.....	100 lbs.	\$0 65	\$60 00

Superintendents', Gardeners', and Farmers' Situations

We have at all times the names of practical and thoroughly reliable men in want of situations. If parties desiring such will write us, we shall be glad to put them in communication with men whom we deem suitable. We make no charge for this service.
